Post-test graded results

Learner: Sample learner

Digital Literacy Level 2 · Assessment version 2

22 / 28 · 79%

Correct answers · one point per question

Your learning snapshot

Use your results to recognize strengths and plan your next practice.

Your pre/post comparison

Self-entered pre-test: 10/28. Change: +12 points (+43 percentage points). Comparison assumes both scores belong to the same learner and the same assessment version.

Your skills by domain

Domain	Correct	Next step
Technology Basics	4 / 4 	Keep applying
Digital Citizenship	4 / 4 	Keep applying
Information Management	4 / 4 	Keep applying
Content Creation	4 / 4 	Keep applying
Communication	4 / 4 	Keep applying
Collaboration	2 / 4 	Practice this topic
Safety and Security	0 / 4 	Practice this topic

Your next practice steps

Start with these topics, then use the answer explanations below.

1. **Safety and Security** — practice with week 5.
2. **Collaboration** — practice with week 4.

This classroom score guides practice; it is not an IC3 certification score.

Answers and explanations

Correct

1. You are reading a community workshop page at home. Its words are too small, but your email app and desktop labels are readable. What should you try first?

Your answer: Enlarge the webpage with browser zoom.

Browser zoom changes the size of webpage content. Display scaling affects the wider desktop, and brightness changes light output. Start with the control that matches the problem, then check the result.

[Review week 1](#) · Technology Basics

Correct

2. A community group is choosing a meeting time. The organizer needs your available times, not the details of your personal appointments. Which calendar information should you share?

Your answer: Free/busy times without appointment details.

Free/busy sharing answers the scheduling question without exposing appointment details. Check the actual sharing settings and what the other person can see; sharing a whole calendar may reveal more than the task needs.

[Review week 1](#) · Technology Basics

Correct

3. You begin typing a volunteer's email address, and autocomplete selects another person with a similar name. The message is meant for only one volunteer. What should you do before sending?

Your answer: Check the full address and select the intended person.

Autocorrect and autocomplete offer suggestions, not guarantees. Check names, full addresses and meaning yourself. A correctly spelled word or familiar contact can still be wrong for this message.

[Review week 1](#) · Technology Basics

Correct

4. You need 15 copies of a library workshop flyer. You have changed the page layout since its last printout. Which step best avoids wasting paper?

Your answer: Check the destination and preview, then inspect one printed copy.

The selected printer may be left over from another task, and a layout change can alter the output. Confirm the destination and preview, then inspect one test copy before sending the remaining copies.

Review week 1 · Technology Basics

Correct

5. You are ready to answer a community group question in your volunteer role. Your browser has opened your personal profile instead. What is the best next step?

Your answer: Select the volunteer profile and confirm who will see the reply.

The active account determines the identity attached to a post. A signature or profile picture does not switch accounts. Confirm both your role and the intended audience before posting.

Review week 4 · Digital Citizenship

Correct

6. On Sunday evening, you finish a handout for a team that reviews work on weekdays. Feedback is needed by Thursday. Which message plan gives a clear, reasonable expectation?

Your answer: Send during the team's usual hours and ask for feedback by Thursday.

Match message timing to urgency and the group's expectations. A specific deadline tells the recipient when to act. For a nonurgent task, an urgent label or repeated reminders creates needless pressure.

Review week 4 · Digital Citizenship

Correct

7. A new volunteer asks you to explain a term in a shared handout. They have not used this program before. Which response respects their experience and supports learning?

Your answer: Define the term and connect it to the task they are trying to do.

Explain the unfamiliar term and connect it to the task. One question does not tell you someone's overall ability. Plain language and an offer of help support learning without making assumptions.

Review week 4 · Digital Citizenship

Correct

8. You need to change a reminder in an updated calendar app. A saved tutorial shows a menu that is no longer there. How should you look for instructions that fit?

Your answer: Check current official help for the app and the reminder task.

Current official help is a good starting point when menus change. Identify the app version and the task, rather than relying only on old button positions. When asking for help, describe what you tried and what happened.

Review week 1 · Digital Citizenship

Correct

9. You want an in-person computer class at a public library near Elkins, West Virginia. Which search is the best starting point for this task?

Your answer: Elkins WV public library computer classes

Useful search terms name the service, place and setting you need. These searches are starting points, not proof that a class exists. Confirm current details with the library before making plans.

Review week 2 · Information Management

Correct

10. An online directory says a nearby community center offers free computer repairs. It does not say where that information came from. What should you do before relying on the offer?

Your answer: Confirm the service through the center's official contact information.

Verify a service with the organization responsible for providing it. Search position, appearance and repeated claims do not establish current availability. Check the details that matter for your visit.

Review week 2 · Information Management

Correct

11. You need a local workshop you can attend in person. A reliable community-center page lists a class in another state with no online option. What is missing for your task?

Your answer: A class relevant to the place where you can attend.

Accuracy and relevance are different checks. A trustworthy page can describe a real class that does not fit your location or attendance needs. Use the source that answers your actual question.

Review week 2 · Information Management

Correct

12. A fictional community-center form lets you request a workshop place. Some fields are optional and do not seem related to booking. What is the best approach before completing the form?

Your answer: Check the collector and purpose, then provide only information needed for the task.

Check who collects the information, the purpose and the required fields. Optional does not mean necessary. In class, use fictional details; review the completed request and read its confirmation.

Review week 2 · Information Management

Correct

13. Your community workshop guide has three main sections. You want clear structure that assistive technology can recognize, not just titles that look different. What should you use?

Your answer: Built-in heading styles at the appropriate level.

Heading styles give section titles structural meaning, which helps navigation and assistive technology. Bold, font size and spacing can change appearance without creating that structure.

Review week 3 · Content Creation

Correct

14. Your practice supply list has 6 notebooks in C2, 4 folders in C3 and 3 pens in C4. You want the total quantity to update if any entry changes. Which formula should you use?

Your answer: =SUM(C2:C4)

The colon includes every cell in the range, including the middle row. Adding only the first and last cells misses an item. A fixed number can look correct now but will not update when an input changes. Test the formula by changing one input.

Review week 3 · Content Creation

Correct

15. You want to adapt a diagram from a website for a library workshop handout. You have not checked its license or permission terms. What should you do first?

Your answer: Check whether adapting it is allowed and what attribution is required.

Find the actual license or permission and follow its conditions, including whether changes are allowed and what credit is needed. Credit, a screenshot or free distribution does not by itself establish permission. Use an approved alternative if permission is unclear.

Review week 3 · Content Creation

Correct

16. A coauthor must correct the wording in your community resource guide before it is finished. Which sharing choice lets them make those changes directly?

Your answer: Share the editable file with suitable editing access.

Direct revision needs both an editable format and permission to edit. A screenshot shows the content but does not provide editable paragraphs. A view-only link also prevents the intended task; a checked PDF can be useful later for finished distribution.

Review week 3 · Content Creation

Correct

17. You are emailing a community organizer to ask when the resource workshop starts. Which subject line most clearly describes your request?

Your answer: Please confirm the resource workshop start time

A useful subject names the topic and the action needed. A vague subject hides the request, while saying something is confirmed incorrectly suggests the question is already settled. Put the needed context in the message as well.

Review week 4 · Communication

Correct

18. You are emailing a library event reminder to several volunteers. They should receive the message without seeing the full list of other recipients' addresses. Which field fits?

Your answer: Bcc for the addresses that should be hidden.

Bcc hides those recipient addresses from other recipients; To and Cc normally show them. Bcc does not encrypt the message, stop forwarding or make an attachment safe.

Review week 4 · Communication

Correct

19. A fictional video service offers a free month, and you only want to try one lesson. What information do you need before accepting the offer?

Your answer: Renewal timing, the later price and cancellation terms.

Look beyond the introductory price to renewal and cancellation terms. Removing an app is not the same as following the service's cancellation process. The class uses fictional offers and does not require a real purchase.

Review week 4 · Communication

Correct

20. A fictional free app offers an optional tool for a one-time \$3 charge. You are reviewing the offer in class. What should happen before anyone authorizes that upgrade?

Your answer: Review the separate charge and purchase terms before deciding.

The download price and the price of an extra feature are separate. Read the purchase details before authorizing anything; do not assume when or whether a charge applies. No real payment is needed for the practice.

Review week 4 · Communication

Correct

21. A community team meets online and edits one shared workshop outline together during the meeting. What type of collaboration is this?

Your answer: Synchronous work because people are collaborating at the same time.

Synchronous means working together at the same time. Asynchronous work happens at different times, such as leaving comments for tomorrow. Online storage and separate computers do not determine which timing pattern the team uses.

Review week 4 · Collaboration

Correct

22. You want a volunteer to point out unclear steps in a draft. They should add feedback without directly changing the document. The tool supports comments. Which permission should you give?

Your answer: Commenter access to that volunteer.

Commenter access supports feedback without direct rewriting. Viewer access does not provide the requested commenting ability in this scenario, and a public editing link gives more access than the task requires.

Review week 4 · Collaboration

Review this topic

23. A workshop guide uses an abbreviation without explaining it. New readers may not know what it means. Which comment would best help the author revise the guide?

Your answer: Improve this section because it needs more work.

Correct answer: Spell out the abbreviation the first time so new readers can follow the steps.

Useful feedback identifies the specific problem, suggests a change and explains how readers benefit. Vague criticism leaves the author guessing. A cosmetic change does not supply missing information.

Review week 4 · Collaboration

Review this topic

24. You would like to save a video discussion from a library workshop for later study. The recording would include other participants. What should guide your next step?

Your answer: Treat an invitation to attend as automatic permission to record.

Correct answer: Follow the organizer's recording rules and confirm the needed permission.

The presence of a Record button or an invitation does not establish recording permission. Check the organizer's rules and the appropriate permissions before recording participants. A helpful purpose does not replace that check.

Review week 4 · Collaboration

[Review this topic](#)

25. A volunteer cannot comfortably use a mouse, and another studies with the sound off. Which workshop page would let both people complete the task?

Your answer: One with keyboard access but no text alternative to spoken content.

Correct answer: One with keyboard access and accurate captions for spoken content.

Flexible input and captions address different needs. Providing both lets more people complete the same task in different situations. Supporting one need does not remove the other barrier.

[Review week 5](#) · Safety and Security

[Review this topic](#)

26. In a fictional community forum, someone you have never met builds a friendly relationship and asks you to keep a request for private information secret. Their identity is unverified. What should you do?

Your answer: Rely on the friendly conversation as proof of who they are.

Correct answer: Withhold the information and check their identity independently.

A false identity used to build trust is called catfishing. This scenario does not prove the person is an impostor, but friendliness and local photos do not verify identity. Pause and check through a separate trusted route before sharing private information.

[Review week 5](#) · Safety and Security

[Review this topic](#)

27. An unfamiliar person leaves a USB drive labeled “useful workshop files” at the community computer lab. Staff have not approved it. What should you do?

Your answer: Open it briefly because the label describes useful material.

Correct answer: Keep it disconnected and ask authorized staff what to do.

An unknown drive can carry harmful software. Its label and appearance do not prove it is safe, and switching computers does not remove the risk. Let authorized staff handle it without connecting it yourself.

[Review week 5](#) · Safety and Security

[Review this topic](#)

28. You are protecting a stored practice document. Preventing edits is not enough; someone without the key should be unable to read its contents. Which protection matches that need?

Your answer: Renaming the document to make it less obvious.

Correct answer: Encrypting the stored data.

Encryption protects readable data by requiring the appropriate key or authorized access. Read-only settings restrict changes, renaming changes a label, and an ordinary ZIP is not automatically encrypted. An unlocked account or device still needs protection.
