

Digital Literacy Level 2 syllabus

WV Veterans Upward Bound · IC3 Digital Literacy GS6 Level 2 + Web App Building

Mondays, September 28–November 2, 2026 · 4:30–6:30 p.m. Eastern Time

Six meetings · 12 contact hours · Computer lab instruction

For veterans who can use a mouse and keyboard, open a browser and manage basic files. Level 1 or equivalent experience is recommended. Ask the instructor for a refresher when needed.

What you will be able to do

- Adjust device and browser settings for a task.
- Create a practice appointment and choose what others can see.
- Select a connection and a printer; verify the result.
- Refine a search and justify a source choice.
- Complete a fictional online form and check its confirmation.
- Organize files, set access and explain a recovery path.
- Structure a document for reading and revision.
- Use a formula and format a small workbook.
- Adapt a presentation and media for an audience and credit reused work.
- Choose a communication channel and write a clear email.
- Collaborate using comments, coauthoring and version history.
- Explain online purchases, subscriptions and digital identities.
- Explain device, file and account protections.
- Recognize manipulation and choose a safe next step.
- Demonstrate core tasks and complete the parallel post-test.
- Describe a small app and write a bounded AI prompt.
- Explain HTML, CSS, JavaScript and browser storage.
- Test a prototype, revise one behavior and explain what a hosted service still needs.

Cohort schedule

Meeting	Focus	Evidence of learning
Week 1 September 28, 2026 4:30–6:30 p.m.	Make technology work for you	Set up a comfortable workspace, organize a calendar, and solve everyday device problems. Pre-test.
Week 2 October 5, 2026 4:30–6:30 p.m.	Find, judge, and organize information	Find a reliable community resource and manage a shared file with care.
Week 3 October 12, 2026 4:30–6:30 p.m.	Create something people can use	Build a clear resource handout, a small workbook, and a short presentation.
Week 4 October 19, 2026 4:30–6:30 p.m.	Communicate and collaborate with care	Choose the right channel, give useful feedback, and make safe online choices.
Week 5 October 26, 2026 4:30–6:30 p.m.	Protect your work and show your skills	Practice safe decisions, complete a skills challenge, and measure your growth. Post-test and skills challenge.
Week 6 November 2, 2026 4:30–6:30 p.m.	Build a small web app with AI	Turn a clear need into a tested, accessible prototype using basic vibe coding. Prototype and test log.

The October 12 meeting is included as scheduled. Confirm building access with the program before that meeting.

How we will learn

Each meeting combines demonstration, a short captioned explainer, guided practice, a break, partner work and a check for understanding. Use fictional examples throughout. The final week supports either an approved AI tool or a supplied starter app with no AI account required.

Learning checks

The pre-test occurs before instruction in week 1. The parallel post-test follows the GS6 lessons in week 5. Each has 28 questions, four per domain, and produces printable graded results. The week 6 prototype uses a separate 8-point rubric. Scores guide practice; they are not certification results.

Materials and access

Bring your willingness to practice. A workstation, browser, headphones, word processor, spreadsheet app and plain-text editor support the activities. Captions, transcripts, keyboard navigation, text sizing and print copies are available. No real purchases, private records or paid AI account are needed.

Between meetings

Optional: repeat one class task with fictional data and note where you need help. Save your worksheets and assessment results before leaving a shared computer.
