

Digital Literacy Level 2 post-test

28 questions · 4 per GS6 domain · one answer per question. Take about 25 minutes; there is no countdown. This is a classroom learning check, not an IC3 certification exam.

Topics: technology basics; digital citizenship; information management; content creation; communication; collaboration; safety and security.

Answers remain in this browser tab's session. They are not submitted to a server. Print or download results, then clear them on a shared computer.

Post-test graded results

Digital Literacy Level 2 · Assessment version 1

28 / 28 · 100%

One point per correct answer. This classroom score guides practice; it is not an IC3 certification score.

Results by domain

Domain	Correct	Practice guidance
Technology Basics	4 / 4	Keep applying these skills
Digital Citizenship	4 / 4	Keep applying these skills
Information Management	4 / 4	Keep applying these skills
Content Creation	4 / 4	Keep applying these skills
Communication	4 / 4	Keep applying these skills
Collaboration	4 / 4	Keep applying these skills
Safety and Security	4 / 4	Keep applying these skills

Answers and explanations

1. The text on a service website is too small. What should you try first?

Correct · Your answer: Use the browser's zoom control

Browser zoom changes webpage size. Choose the control that matches the problem.

[Review week 1](#) · Technology Basics

2. A volunteer scheduler only needs to know when you are unavailable. What should you share?

Correct · Your answer: Free/busy information

Free/busy can support scheduling without disclosing event details. Verify the service's options.

[Review week 1](#) · Technology Basics

3. Autocomplete suggests the wrong email address. What is the best response?

Correct · Your answer: Check and choose the intended address

Automation can save time but needs review, especially for names, addresses and meaning.

[Review week 1](#) · Technology Basics

4. A handout is going to a shared lab printer. What should you verify first?

Correct · Your answer: Printer destination, preview and a test page

Verify the destination and output before sending a large print job.

[Review week 1](#) · Technology Basics

5. Before posting in a professional group, what should you check?

Correct · Your answer: The active identity, audience and account credentials

Check the identity and audience. Keep credentials distinct and use appropriate account protections.

Review week 4 · Digital Citizenship

6. You need feedback next week. What is a considerate communication choice?

Correct · Your answer: State the deadline and respect expected working hours

Timing and a clear response expectation help the recipient respond appropriately.

Review week 4 · Digital Citizenship

7. A new teammate does not know an abbreviation. What should you do?

Correct · Your answer: Explain it plainly without making assumptions

Inclusive communication explains context and avoids assumptions about age, culture or ability.

Review week 4 · Digital Citizenship

8. You cannot find a command in an updated app. What is the best next step?

Correct · Your answer: Use current official help and describe the exact task

Version-specific help and a precise question support independent learning.

Review week 1 · Digital Citizenship

9. You need local public-library opening hours. Which query best fits?

Correct · Your answer: Library name, town and opening hours

Search terms should identify the service and location needed for the task.

Review week 2 · Information Management

10. A directory promises a local service without naming a source. What is the best check?

Correct · Your answer: Confirm availability through the provider's official contact

Responsible sources and corroborating evidence matter more than ranking or appearance.

Review week 2 · Information Management

11. A reliable article explains an old program that no longer operates locally. What is the problem?

Correct · Your answer: It may be outdated or irrelevant to this task

Accuracy, currency and relevance are separate questions.

Review week 2 · Information Management

12. A service-request form asks for information unrelated to the request. What should you do?

Correct · Your answer: Check the purpose and collector before providing it

Understand the collection purpose, provide only needed information, and check the result.

Review week 2 · Information Management

13. How should you mark a document's main sections?

Correct · Your answer: Apply appropriate heading styles

Real heading styles provide structure; visual bolding alone does not.

Review week 3 · Content Creation

14. C2, C3 and C4 contain quantities. Which formula totals that range?

Correct · Your answer: =SUM(C2:C4)

A colon marks an inclusive cell range. Verify the formula by changing one input.

Review week 3 · Content Creation

15. You want to adapt someone else's diagram. What is the right first step?

Correct · Your answer: Check allowed uses and attribution conditions

Find the actual reuse permission and follow its conditions.

Review week 3 · Content Creation

16. A coauthor must change wording in your handout. What should you provide?

Correct · Your answer: The editable file with suitable permissions

Choose the format and access that support the recipient's task. PDF is often useful for finished layout.

Review week 3 · Content Creation

17. Which subject best helps a recipient act on a schedule question?

Correct · Your answer: Please confirm the resource workshop start time

A specific subject tells the recipient what the message concerns.

Review week 4 · Communication

18. You use Bcc for an announcement. What protection does it provide?

Correct · Your answer: Conceals that recipient list from other recipients

Bcc hides recipient addresses; it does not encrypt content or prevent forwarding.

Review week 4 · Communication

19. A streaming offer starts at no charge. What should you check before accepting?

Correct · Your answer: Whether it renews, the price and how to cancel

Free trials can become recurring subscriptions. Review the terms and total cost.

Review week 4 · Communication

20. A downloaded app offers extra features for purchase. What is a sensible step?

Correct · Your answer: Review the charge and purchase controls before authorizing

In-app purchases are separate transactions; check terms, controls and receipts.

Review week 4 · Communication

21. A team coauthors a file during a live call. Which description fits?

Correct · Your answer: Synchronous collaboration

Synchronous collaboration happens at the same time; asynchronous work happens at different times.

Review week 4 · Collaboration

22. A partner only needs to leave feedback on your draft. Which permission is appropriate when available?

Correct · Your answer: Commenter access

Commenter access fits feedback without granting direct editing rights.

Review week 4 · Collaboration

23. Which comment best helps improve a shared handout?

Correct · Your answer: Define this abbreviation so a new reader can follow the instructions.

Useful feedback names a specific change and explains the benefit.

Review week 4 · Collaboration

24. You want to save a webinar discussion that includes participants. What should guide your decision?

Correct · Your answer: Organizer rules and appropriate recording permission

Meeting etiquette includes checking recording permissions and respecting participants.

Review week 4 · Collaboration

25. Which feature helps people use technology in different situations?

Correct · Your answer: Captions and flexible input methods

Universal design increases usability across needs and situations.

Review week 5 · Safety and Security

26. Someone invents a personal profile to manipulate a relationship. Which term fits?

Correct · Your answer: Catfishing

Catfishing uses a false identity to build trust or manipulate someone. Pause and verify independently.

Review week 5 · Safety and Security

27. A stranger offers a USB drive with a useful app. What is the safest class response?

Correct · Your answer: Do not connect it; consult authorized support

Untrusted portable media can carry harmful software. Follow approved device procedures.

Review week 5 · Safety and Security

28. An encrypted device is lost while powered off. What does encryption help protect?

Correct · Your answer: The readability of stored data without its key

Encryption protects data readability. It does not replace other account, device or trust checks.
